

## SAHRIS OBJECT PDF REPORT

**Object Code:** BP/1/4934

**Quantity:** 1.00

**Cultural Association:**

**Maker:**

**Production Place:**

### **Description:**

Neotype skull of *Massospondylus*, and belongs to a partial specimen consisting of the front half of the body (the pelvic girdle and tail are missing). Found by James Kitching in March 1980, on farm Borsmansdrift 133, located on Map 2827CD (Mekoatleng's Nek). Age: approximately 200 million years old, from the upper part of the Elliot Formation of the Stormberg Group. The skull is a single, well-indurated unit that has been fully prepared from rock matrix externally.
