

SAHRIS OBJECT PDF REPORT

Object Code: JL-F-2

Quantity: 1.00

Cultural Association:

Maker:

Production Place: Eastern Cape

Description:

Stem composed of rectangular bars - from the ivory/bone elongated cone of the mouthpiece, one section angles down from the horizontal at 90 degrees and then angles again along the horizontal to join the bottom of the pipe bowl. In the rectangular opening between the bowl side and the vertical bar of the stem is a T shape filling the space and joining across from the vertical bar to the upper end of the pipe bowl. Filling the inner angle created in the angle between the mouthpiece bar and the vertical bar is a stepped design.
