

SAHRIS OBJECT PDF REPORT

Object Code: OES-OSTRICH-CASEID12761

Quantity: 35.00

Cultural Association:

Maker:

Production Place:

Description:

Permanent export of ostrich eggshell samples and calcrete samples is requested. Ostrich eggshell will be used for isotope analysis to collect data on palaeoclimates and for Amino Acid Racemisation (AAR) dating. Calcrete will be sectioned to investigate the development of the sequence and presence of fossil inclusions. Preparation of OES and calcrete analysis will take place at University of Exeter with isotope analysis carried out at University of Southampton, and AAR at University of York.
