

## SAHRIS OBJECT PDF REPORT

**Object Code:** 84/718

**Quantity:** 1.00

**Cultural Association:**

**Maker:**

**Production Place:**

### **Description:**

A finger cot (also finger frock or finger stall, informally finger condom) is a medical device used to cover one or more fingers in situations where a full glove seems unnecessary. Like medical and rubber gloves, finger cots may be made from a variety of water-tight materials including latex, nitrile rubber, and vinyl. Material: Tin. Colour: Silver. Maker: Boots Chemists.

### **Provenance:**

Cape Medical Museum
