

SAHRIS OBJECT PDF REPORT

Object Code: 84/845

Quantity: 1.00

Cultural Association:

Maker:

Production Place: Birmingham

Description:

The chair weighing scale is used to overcome the obstacle of weighing patients with limited mobility whilst providing the most precise results possible. These results can then be monitored by healthcare professionals over a given period of time. Inscale currently offers two types of chair scale, the MCW and PTM wheelchair scale. Material: Wood, metal. Colour: Brown, silver & white. Maker: Avery. Place: Birmingham, England, c. 1935.

Provenance:

Cape Medical Museum
