

## SAHRIS OBJECT PDF REPORT

**Object Code:** 84/162

**Quantity:** 1.00

**Cultural Association:**

**Maker:**

**Production Place:**

### **Description:**

First aid for cuts and wounds is provided by an antiseptic pencil that may be carried in a metal container or bag. Resembling a fountain pen, it holds a hundred drops of iodine. When the cap is removed, and the antiseptic pencil is tapped lightly a drop of iodine falls upon the wound. The nozzle is removable for refilling, c. 1940.

### **Provenance:**

Cape Medical Museum
