

SAHRIS OBJECT PDF REPORT

Object Code: 75 Mostert Melkbosstrand F6G6 rib sample

Quantity: 1.00

Cultural Association:

Maker:

Production Place:

Description:

Mostert 75, F6 + G6:

A relatively complete and less well preserved (compared to G8H8) skeleton of a female who appears to have died in her 30's. The sample is of a fragmentary right rib that is probably a fifth, plus a rib fragment that shows relatively good preservation on its broken edge.
